

The 11th East Asian conference in Harmonic Analysis and Applications

Date: August 15 (Thur.) - 19 (Mon.), 2024

Place: 5th floor of International Science Innovation Building (No. 69), Kyoto University
Access

---Titles of the talks on 18th---

Plenary talks: 50 min.

- Ji Li, (Macquarie University),
Date: 18th 10:00 - 10:50.
– Title: *Schatten properties of Riesz transform commutator in the two weight setting.*
- Jinmyoung Seok, (Seoul National University),
Date: 18th 15:20 - 16:10.
– Title: *Quantum and classical models of stars and their consistency.*
- Yutaka Terasawa, (Nagoya University),
Date: 18th 16:30 - 17:20.
– Title: *Asymptotic behavior of solutions to elliptic equations in 2D exterior domains.*

Talks: 30 min.

- Motofumi Aoki, (Kyoto University),
Date: 18th 11:10 - 11:40.
 - Title: *On the ill-posedness for compressible Navier–Stokes equations in three dimensions.*
 - Kangwei Li (Tianjin University),
Date: 18th 11:10 - 11:40.
 - Title: *Endpoint multilinear restricted weak type extrapolation theorem.*
- — —break — — —
- Liguang Liu, (Renmin University of China),
Date: 18th 12:00 - 12:30.
 - Title: *Heat Kernel Constructions on Metric Measure Spaces.*
 - Ryota Kawasumi, (Kobe Gakuin University),
Date: 18th 12:00 - 12:30.
 - Title: *Pointwise convergence using deep neural networks or the Fourier series theory.*
- — —Lunch break — — —
- Qingying Xue, (Beijing Normal University),
Date: 18th 14:30 - 15:00.
 - Title: *On the boundedness of Calderón commutators.*
 - Kwan Woo, (UNIST),
Date: 18th 14:30 - 15:00.
 - Title: *Fabes-Stroock Approach to Elliptic Equations with Singular Drift.*
