

3rd Kyoto conference on automorphic forms

Date: June 26 – 28, 2015

Location: Kyoto University, Graduate School of Science Bldg No.3 Rm 110 (See <http://www.kyoto-u.ac.jp/en/access/campus/north.htm>)

Program

June 26

13:00 – 14:00 Atobe, Hiraku (Kyoto University)

Title: The local Gan-Gross-Prasad conjecture for symplectic-metaplectic groups.

14:10 – 15:10 Yamana, Shunsuke (Kyoto University)

Title: Gan-Gross-Prasad conjecture for metaplectic groups

15:20 – 16:20 Wakatsuki, Satoshi (Kanazawa University)

Title: The dimensions of spaces of Siegel cusp forms of general degree

16:30 – 17:30 Sato, Fumihiro (Tsuda College, Institute for Mathematics and Computer Science)

Title: Zeta functions of Clifford quartic forms and Eisenstein series of orthogonal groups

June 27

9:30 – 10:30 Ozawa, Tomomi (Tohoku University)

Title: On Hecke equivariance of a residue mapping

10:40 – 11:40 Tajima, Kazuaki (Tohoku University)

Title: On the GIT stratification in the non-split case

11:50 – 12:50 Tsuzuki, Masao (Sophia University)

Title: Distinguished automorphic spectrum of unitary groups

June 28

9:30 – 10:30 Takemori, Sho (Hokkaido University)

Title: Computation of vector valued Siegel modular forms of degree 2 and level 1

10:40 – 11:40 Ishii, Taku (Seikei University)

Title: Archimedean zeta integrals for generic cusp forms on $\mathrm{GSp}(2)$

11:50 – 12:50 Ishitsuka, Yasuhiro (Kyoto University)

Title: Geometric interpretations of tuples of matrices

This conference is partially supported by JSPS, Grant-in-Aid (B) (24340001).

Organizer:

Akihiko Yukie (Kyoto University)
